TAKING TECHNOLOGY TO A NEW DIMENSION

TECHNOLOGY YOU CAN FEEL

Dunlop has further enhanced its Aerogel technology by entering the next dimension with 4D braiding. Four directional braided cloth is used at key points on the racket frame to significantly increase racket stability. This results in exceptional racket control without sacrificing the established Dunlop racket feel. 4D braiding has been implemented across the whole Dunlop Aerogel portfolio, offering outstanding benefits to players of all abilities.

Dunlop is the **No. 1 racket** on the world tour. More world top 50 players use Dunlop than any other brand.
